ALLOWANCE

The following is an allowance in response to Applicant's amendments filed January 2, 2010 and January 19, 2010. Applicant's amendment filed January 19, 2010 amended claim 25, canceled claims 1-24 and 26-37 and added new claims 38-57. Currently claims 25 and 38-57 are pending and allowed below.

Response to Amendment

The rejection of claims 1, 14 and 25 under 35 U.S.C. 102(b) is withdrawn in response to Applicant's cancellation of claims 1 and 14 and amendment of claim 25.

The 35 U.S.C 103(a) rejection of claims 1-14 and 25-33 in the previous office action are withdrawn in response to Applicant's cancellation of claims 1-14 and 25-33 and amendment to claim 25.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance.

The present invention is directed to system and method for aggregating a semi-additive measure over an additive and a non-additive dimension of a cube.

The closest prior art Netz, OLAP Services (1999), Kimball et al., The Data Warehouse Toolkit (2002), Whitehorn, Fast Track to MDX (2002) and Shah et al., U.S. Patent No. 7,072,897 fail to teach or suggest either singularly or in combination a

system/method for aggregating a semi-additive measure over an additive dimension of a cube and over a non-additive dimension of the cube by: aggregating the semi-additive measure for a plurality of members of the additive dimension using an additive aggregation function; providing a first interface comprising a plurality of first user-selectable elements, each first user-selectable element associated with a respective account type that is an income account type, an expense account type, a flow account type, a balance account type, an asset account type, a liability account type, a statistical account type or a missing account type; receiving a user selection of at least two of the first user-selectable elements; defining, based on the selected first user-selectable elements, a first account associated with a first data table and comprising a plurality of first members of the non-additive dimension and a second account associated with a second data table and comprising a plurality of second members of the non-additive dimension, the non-additive dimension having a parent member that includes at least one child member selected from the first members and the second members; providing a second interface comprising a plurality of second user-selectable elements, each second user-selectable element associated with a respective non-additive aggregation function that is different from the additive aggregation function; for each of the first and second accounts, receiving a user selection of one of the second user-selectable elements; associating the first account with the non-additive aggregation function that is associated with the second user-selectable element that was selected for the first account; associating the second account with the non-additive aggregation function that is associated with the second user-selectable element that was selected for the second

account; evaluating the parent member by aggregating the semi-additive measure for the first members according to the non-additive aggregation function associated with the first account and by aggregating the semi-additive measure for the second members according to the non-additive aggregation function associated with the second account; and outputting the evaluated parent member. as recited in independent Claims 25, 38 and 45.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
